HEALTHY PLANTS

You run no risk of buying unhealthy stock of us. Our plants are all tested by state inspectors twice each year as the following certificate shows:

No. 3329

STATE OF NEW YORK
DEPARTMENT OF AGRICULTURE AND
MARKETS

Berne A. Pyrke, Commissioner

Certificate of Inspection of Nursery Stock

This is to Certify that the nursery stock of Charles Zicha of Central Bridge, County of Schoharie, State of New York, has been duly examined in compliance with the Agriculture and Markets Law and has been found to be apparently free from all injurious insects and plant diseases. This certificate is valid until September, 1, 1932.

Dated, Albany, N. Y. September 1, 1931.

SPRING 1932

Last year was exceptionally favorable for the growth of plants and therefore we have the best stock we ever had to offer this season.

Most prices on Nursery Stock are somewhat lower than ever before. Altho we could not drop ours much because they were cut to rock bottom last year, you will still find our prices the lowest and our quality second to none. Where we did not lower our prices we tried to better our plants.

Our roses are extra good this season and we have added several new varieties to our list which we are sure will please all who try them.

Before you buy evergreens elsewhere come and look over our stock. The low prices on our trees might mislead some to think their quality is poor but this is not the case as an examination will show.

Water Lillies are giving much satisfaction to those who try this kind of gardening. No one would believe how much pleasure there is in an old tub till he tries growing Aquatics.

The varieties listed are all hardy and can be kept over from year to year.

We do not pay postage. On Parcel Post shipments add 10% to cover cost of shipping or we can send by Express Collect.

Perennial Plants

Our plants are strong, healthy and well rooted. They are freshly dug from the field the day your order is being filled. Every shipment of plants from our Nurseries carries a State Inspection Certificate.

FOR ROCKERIES

Two very interesting plants for Rock Gardens
are Cotoneaster Horizontalis and Euonymus Radi-
cans Variegata Argent. Neither is exactly new but
have been very scarce until recently. You will find
one listed under shrubs and the other among Vines
and creepers.

DAPHNE CNEORUM

An evergreen shrub that has proven very popu-
lar for Rock Gardens, among evergreens or as a
specimen plant. The flowers are the sweetest scent-
ed in the garden and literally cover the plant each
spring and again in the fall. The foliage hangs on
all winter. Daphne always stays dwarf and never
grows more than 10 inches or one foot in height.

3 yr. plants \$1.25

2 yr. plants \$1.00

FERTILIZER

We have been fortunate enough to secure some old, well rotted cow manure that we can offer for sale at a very reasonable price.

This is the only fertilizer we use in our own gardens and recommend it to our patrons for all perennials, lawns and shrubs. Many people have used this during the last few years with excellent results.

This manure is much better than commercial fertilizer and absolutely safe to use on the tenderest plants.

If you have trouble with your lawn try an application of this fertilizer for quick and lasting results and a permanent sod.

ROTTED COW MANURE

Dry, pulverized, well rotted and absolutely without odor. per bu. (about 50 lb.) 50c

Ask for special prices on large amounts.

AQUATICS

Water gardening is becoming very popular lately because of the great enjoyment that can be derived with so little care and expense.

Of course, with large and elaborate pools, magnificent effects can be created; but a small tub sunk into the ground will give just as large flowers, and as much satisfaction.

A few goldfish and scavengers should always be used to keep the water clean, they also give much pleasure.

We have one plant of Chromatella in a tub last year that had about 50 flowers. The tub was an old barrel sawed in two and sunk into the ground.

AURORA—red and yellow	each \$1.25
CHROMATELLA—the best yellow lily	\$1.25
MARLIAC ALBIDA—a very fragrant white	\$1.25
MARLIAC PINK—a free blooming shell pink,	\$1.25
ROSE AREY—a wonderful cerise pink lily	\$1.25
WATER HYACINTH—a floating plant having blue flowers similar to hyacinths each	25c

We also have all kinds of Gold Fish and Scavengers for cleaning the water and marsh plants for planting around pools, such as, Cat Tails, etc.

LANDSCAPING

If you want a pool made, an evergreen or shrub planting, your lawn fixed or a rockery built, it will pay you to get our estimate on your needs. We can do as good work as any expert at a much lower figure.
